EPCO Introduces 19-cubic-inch Junction Box in Response to Distributors and Contractors Requests

Four .75 inch knockouts accommodate multiple circuit applications to save contractors up to 85 percent in labor and material costs

MINNEAPOLIS, Minn., June 4, 2008—Engineered Products Company (EPCO), a supplier of specialty lighting and wiring solutions, has introduced a 19-cubic-inch Phenolic Junction Box. According to EPCO President Jack Schuster, "Our distributors and their contractor customers have been asking us to bring this product back since we stopped offering it five years ago. We're not only reintroducing it, but we've made it better. The increased capacity of this junction box combined with four (4) .75-inch knockouts allows for multiple circuit applications."

In addition to accommodating multiple circuit applications, the UL-listed 19-cubic-inch junction box is:

- Suitable for use in wet locations, including commercial and agricultural applications.
- Corrosion resistant.
- Appropriate for use with all non-metallic wiring systems.
- Made of high-impact compression-molded phenolic plastic.
- Rated for use with circuit conductors up to 150°C.
- Increased capacity saves contractors time and labor.

Agricultural building electricians and contractors can save time, labor and material costs while meeting 2008 NEC Article 314.16 (A) box-fill requirements. They can install a ventilation fan or power circuit along with the lighting circuit conductors in the same single PVC conduit with room for junction box terminations. This arrangement provides a cost savings of 85% as indicated in the following comparison between EPCO's 12-cubic-inch Junction Box and the new 19-cubic-inch Junction Box.

For more information about the new 19-cubic-inch Phenolic Junction Box or other EPCO products, call (800) 336-1976, contact sales@engproducts.com or visit www.engproducts.com.

About EPCO

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories, and wiring solutions that address a wide range of standard and unique applications. In addition to providing durable and reliable products, the Minneapolis-based company offers multiple configurations of products that meet a wide range of requirements. Known for its consistently reliable delivery and service, EPCO offers convenient shipping and no-risk, guaranteed-to-sell terms. Its sales representatives are the most knowledgeable and reputable in the electrical industry.
