

Illumination Control Fixture Whips - 1/2 Inch

Our Illumination Control Fixture Whip (ICFW) is an integral component for combining power for illumination and control of all lighting systems. The ICFW can be used in new or retrofit construction for lighting systems operating at 120/277 VAC, meets all UL and NEC standards for combining power and lighting circuits with Class 2 or Class 3 control circuits within the same fixture whip.

The ICFW is easily integrated into the architecture of a building using LED luminaires or fluorescent luminaires with dimming ballast and digital controls to:

- Optimize lighting at all times when used with an independent room controller for daylight harvesting as an energy management solution to reduce energy for consumption.
- Operate in compliance with "timed" daily personnel and warehouse schedules.
- Control lighting operations used in combination with occupancy sensors for commercial and industrial applications.

BENEFITS

- UL Listed. File Number EE87199.
- Combines power and lighting circuits with Class 2 or Class 3 control circuits.
- Easy to install and wire, and ready to use right out of the box. Saves time and labor compared to using expensive MC cable or making a solution on the job site.
- Can be used with dimming ballast and digital controls to optimize lighting using daylight harvesting, occupancy sensor, or timing controls.
- Includes two (2) 16 AWG Purple and Pink Jacketed Control Wires.
- Available in stranded or solid wire, and with die cast screw-in, die cast snap-in, or polycarbonate snap-in connectors.
- Meets the requirements of the 2023 National Electrical Code: Articles 300.3(B)(2), (C)(1), Section 725.136(I)(1), and 725.139(A) through (D)(1) and California Title 24 Lighting Controls, Articles 130.1(A)(B)(C)(D)(E).

WHY IS IT NECESSARY TO USE ILLUMINATION CONTROL FIXTURE WHIPS?

- Wireless Lighting Controls use Relay Modules that can be attached to the outside of an electrical junction box with a nipple.
- The connection(s) of the low voltage conductors from the dimmable ballast of LED driver are intended to go through the Junction Box, and through the nipple and into the Lighting Control Relay Module to receive controller commands.
- When the Contractor wants to use a single pre-fabricated Fixture Whip to control a luminaire with control features.

Illumination Control Fixture Whip — Dimensions

Illumination Control Fixture Whip — Application Example

Illumination Control Fixture Whip — Connector Reference Guide

Common connectors used on pre-made assembly.

Size: 1/2"; P/N E00-026-000
Type: Screw-in (lock-nut)
Material: Die Cast
Insulated: Yes or No (circle one)

Size: 1/2"; P/N E00-005-000
Type: Screw-in/Snap-in
Material: Die Cast
Insulated: Yes or No (circle one)

Size: 1/2"; P/N E00-042-002
Type: Set Screw, Squeeze
Material: Steel
Insulated: 3/8": No
1/2": Yes

Size: 1/2"; P/N E00-005-002
Type: Speed Lock Style, Snap-in
Material: Steel
Insulated: Yes

ILLUMINATION CONTROL FIXTURE WHIPS

Part Number	UPC Number	Description	Order Unit	Unit Pkg	Units/Case	Min Order Qty	Ship Wt (Lbs)
