

## Linear Luminaire Accessories

### OCCUPANCY SENSOR

Our Occupancy Sensor (OS) is the energy and cost efficient method to manage illumination systems in applications such as stairwells, warehouses, utility and maintenance buildings, storage areas, tunnels and more.

Installing occupancy sensors can reduce energy consumption up to 45% or more by operating similar to a light switch. The sensor turns the lights on when it senses activity in a room or area, and then turns the light off automatically after sensing no activity after a preset time.

Microwave Sensor (Options R4, R5, and R6): Recommended for ceiling heights 20-feet or lower. This microwave sensor type covers a wide range and detects the slightest movement in its occupancy zone. Detection is sensed through doors, glass, or thin walls.

## LUMINAIRE HOUSING LATCH OPTIONS

LED and Fluorescent Linear Luminaires can be ordered with your choice of Acetal (Plastic) or Stainless Steel Latches. Both cam-type latch options accommodate a variety of application environments.

Acetal (Plastic) Latches (GFF-LC2 or Option C) provide an exceptional combination of heat resistance, durability and strength over a wide range of ambient temperatures with minimal attachment of airborne particles.

Stainless Steel Latches (GFF-L2SS or Option S) are ideal for food processing facilities and related applications. These latches can withstand extreme temperatures for refrigerator and freezer applications as well as the chemicals present in car washes. They are also impervious to acidic conditions making them suitable for use in livestock containment buildings.

## LUMINAIRE MOUNTING HARDWARE

Luminaire Mounting Hardware eliminates drilling through the luminaire housing to maintain the IP66/IP67 “wet” location ingress protection rating. Any luminaire that has been incorrectly installed by drilling, puncturing, piercing or any other means that alters the integrity of the luminaire housing will void the warranty!

Note: For food processing and food service applications, we strongly recommend using our stainless steel mounting brackets versus our standard mounting brackets. The two (2) neoprene spacers on the standard mounting brackets will deteriorate over time especially when pressure washers are used to clean these facilities.

The Luminaire Mounting Hardware includes two (2) “snap-on” mounting brackets that attach to the outside edge of the luminaire housing. P/N GFF-MH (Option MH) is standard and comes with a powder coated finish. P/N GFF-MHS (Option MHS) comes with a stainless steel finish. Both are suitable for ceiling or wall mount applications but can also be used with chain or cable mounting applications when using the S-Hooks.

The 45° Angle Wall Mount Stainless Steel Mounting Hardware (P/N: GFF-MH45 or Option MH45) includes two (2) “snap-on” mounting brackets that attach to the outside edge of the luminaire housing (see Figure A). Comes with a stainless steel finish and mounts at a 45° angle.
