For Immediate Release

EPCO Expanding Energy-Efficient LED Fixture Product Line with New Wet-Location Rated Gasketed LED Series Light Fixture Suitable for Widest Range of Applications

MINNEAPOLIS, July XX, 2014—[Engineered Products Company](#) (EPCO), a supplier of specialty lighting and wiring consumable products for electrical contractors, today announced the availability of a new wet-location rated [Gasketed LED Series Light Fixture](#). Available in four and eight-foot models and a four-foot wide-body model, all are UL-listed as wet location light fixtures and include T8 LED lamps. In the announcement, EPCO President Jack Schuster said, “In addition to energy-efficient lighting for wet locations, our new GLF Series™ Fixture and T8 LED lamps withstand the widest range of ambient temperatures—from -4°F up to 110°F—available in today’s LED market, making it ideal for food processing facilities, commercial kitchens, laundries, industrial facilities, saunas, locker rooms, storage buildings, elevator shafts, car washes and much more.”

Like EPCO’s Gasketed Fluorescent Light Fixtures (GFF Series™), the GLF Series Fixture’s fiberglass housing and polycarbonate diffuser provides a high degree of protection to its internal components critical for eliminating any penetration of water. The continuous “poured-in-place” gasket seals protect the light fixture’s internal components. The impact resistant frosted ribbed diffuser eliminates dark spots, shadows, and pixelization and can withstand breakage from high-power pressure wash-down thereby lowering replacement and subsequent maintenance costs.

In keeping with EPCO’s reputation for easy to install fixtures, the GLF Series Fixture features a tethered, hinged gear tray so the contractor can quickly terminate the incoming power to the light fixture. Fixture-mounting hardware allows the contractor to pre-install the mounting brackets to a vertical or horizontal surface for ceiling or wall mounting without drilling into the fixture. A ½-inch trade size knockout on each end of the light fixture housing accommodates standard conduit fittings.

For more information about the Gasketed LED Light Fixture, other EPCO utility light fixtures and products, or to locate your EPCO sales representative, call (800) 336-1976 or visit www.engproducts.com.

About EPCO

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories, and wiring solutions that address a wide range of standard and unique applications. EPCO's durable, reliable products, high fill rate, on-time delivery, and no-risk purchase terms optimize distributor cash flow and profit margins on the consumable products electricians use for commercial, industrial, agricultural and residential buildings. Known for its exceptional customer service, as well as sales representatives who are the most knowledgeable in the electrical industry, the Minneapolis-based company offers multiple configurations of products to meet a broad variety of building applications. For more information, call (800) 336-1976 or visit www.engproducts.com.
