**For Immediate Release**

**EPCO Extends Temporary Lighting Line with New Compact Fluorescent Lamp Fixture for Construction Sites, Nurseries, Christmas Tree Lots, Garages and More**

*Energy-efficient TIGRESS perfect for low- to medium-bay sites, replaces metal halide-based temporary fixtures*

**MINNEAPOLIS**, Oct. 24, 2013—[Engineered Products Company](#) (EPCO), a supplier of specialty lighting and wiring consumable products for electrical contractors, today announced the availability of its new [TIGRESS™ Temporary](#) Light Fixture, the low-cost, energy-efficient lighting solution for low- to medium-bay construction sites and a recommended alternative to metal halide-based temporary fixtures (under 250-watts). “An extension of our [TIGER](#) and [TIGERcub](#) temporary light fixture line, TIGRESS accommodates a 105-watt compact fluorescent lamp (CFL) to create a productive construction/renovation work environment,” said EPCO President Jack Schuster. “Consuming less than one-half of the total energy costs compared to metal-halide lamps, the 105-watt lamp included with the fixture provides lighting that is comparable to 300 incandescent wattage and lasts about 10 times longer.”

In addition to construction sites, the compact, lightweight [TIGRESS](#)’ ([link to utility lighting on website](#)) portability make it ideal for nursery’s/Christmas tree lots, garages, as well as other outdoor and indoor spaces with 10-foot minimum height. The ETL-listed fixture is a highly reliable, exceptionally durable and maintenance-free performer. Factory-wired for 120V operation, TIGRESS features a five-foot 18/3 SJTW cord, hanging hook, heavy-duty 11 AWG welded lamp guard, and steel housing with a durable white powder-coat finish.

**About EPCO**

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories, and wiring solutions that address a wide range of standard and unique applications. EPCO’s durable, reliable products, high fill rate, on-time delivery, and no-risk purchase terms optimize distributor cash flow and profit margins on the consumable products electricians use for commercial, industrial, agricultural and residential buildings. Known for its exceptional customer service, as well as sales representatives who are

the most knowledgeable in the electrical industry, the Minneapolis-based company offers multiple configurations of products to meet a broad variety of building applications. For more information, call (800) 336-1976 or visit [www.engproducts.com](http://www.engproducts.com).
