EPCO's New Energy-Efficient, Highly Reliable Standard LED Luminaire Fixtures Raise the Bar on Performance with More Usable Lumens per Watt for Standard- and Wet-Location Applications

Improved thermal dissipation, no-glare illumination, and color-rendering index of 80-plus ideal for 12-foot and higher lighting distances

MINNEAPOLIS, Feb. 2, 2015—[Engineered Products Company](#) (EPCO), a supplier of specialty lighting and wiring consumable products for electrical contractors, today announced the first in its new energy-efficient, exceptionally reliable series of LED Luminaire fixtures that provide unparalleled performance, improved efficacy, and more usable lumens per watt for standard- and wet-location applications. These LED Luminaires consume less than half the wattage of a four-foot luminaire with two 32-watt T8 fluorescent lamps and has a minimum life expectancy of 50,000 hours.

The Standard LED Luminaire is the first of several products in the series, including a complete installation-ready parking garage luminaire, as well as retrofit kits for both its four- and eight-foot T8 fluorescent fixtures and four-foot fluorescent parking garage fixtures.

EPCO President Jack Schuster said, “To meet the growing demand for vapor-tight energy-efficient lighting, our solid-state lighting solution that provides improved thermal dissipation for optimizing light output that’s suitable for indoor, outdoor and wet locations. It truly is the preferred lighting solution for 12-foot and higher distances, with even light distribution, no-glare illumination, and a color-rendering index of 80 and above.”

Ready for immediate installation in new construction and renovation projects, EPCO’s solid-state LED Luminaires are ETL listed and meet UL 1598 Standards. Providing wet location protection, these fixtures

are ideal for commercial kitchens, food processing facilities, refrigerators and freezers, laundries, locker rooms, saunas, warehouses and more.

Contractors should check with local electric utilities and co-ops for availability of prescriptive or custom rebates to reduce overall installed cost.

About EPCO

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories, and wiring solutions that address a wide range of standard and unique applications. EPCO's durable, reliable products, high fill rate, on-time delivery, and no-risk purchase terms optimize distributor cash flow and profit margins on the consumable products electricians use for commercial, industrial, agricultural and residential buildings. Known for its exceptional customer service, as well as sales representatives who are the most knowledgeable in the electrical industry, the Minneapolis-based company offers multiple configurations of products to meet a broad variety of building applications.
