Engineered Products Company Unveils LED Luminaire with Motion Sensor as Simple Solution for Small Space Lighting Upgrades

MINNEAPOLIS, Dec. 4, 2018—Engineered Products Company (EPCO), a supplier of specialty lighting and wiring consumable products for electrical contractors, today announced that the company has introduced a new LED Luminaire for indoor spaces that require a compact yet powerful lighting solution. The new Small Space LED Luminaire with Motion Sensor quickly and easily transforms dimly lit confined spaces into bright, well-lit locations with sustainable, energy efficient lighting.

The Small Space LED Luminaire with Motion Sensor provides unparalleled performance, improved efficacy, more usable lumens per watt and is a reliable and sustainable LED lighting solution for small areas. Designed for ceiling and/or wall mount applications, the luminaire comes with three settings:

- **Wall switch operation.** The luminaire operates as a “switched” luminaire controlled by a standard wall switch.
- **Occupancy mode.** A “green” LED indicates the motion sensing LED is operating in the automatic mode to detect the presence of motion up to 20-feet away. The luminaire will continue to operate until no motion is detected for an additional three minutes.
- **Off.** The luminaire functions with a standard on/off switch that energizes the luminaire.

Perfect for new or retrofit applications, the Small Space LED Luminaire is cost effective, eliminates batteries and saves money. It comes with a 13-Watt LED Luminaire and snap-on frosted acrylic diffuser.

“The beauty of the small space LED luminaire is that it allows contractors to offer a practical and simple solution for tricky, small space lighting issues,” said EPCO President Jim Anderson. “The luminaires can be effortlessly installed and the cost savings alone are reason to celebrate.”

About EPCO

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories and wiring solutions that address a wide range of standard and unique applications. EPCO’s durable, reliable products, high fill rate, on-time delivery and no-risk purchase terms optimize distributor cash flow and profit margins on the consumable products electrical contractors use for commercial, industrial, agricultural and residential buildings. Known for its exceptional pre-and post-sale customer service, as well as sales representatives who are the most knowledgeable in the electrical industry, the Minneapolis-based company offers multiple configurations of products to meet a broad variety of building applications.
