**EPCO Expands GFF Series Fixture Line with New Two-Foot Model for Limited-Space
Commercial Marine Locations**

Ideal lighting solution for workboats, freighters and other shipping maritime facilities

MINNEAPOLIS, April 29, 2013—[Engineered Products Company](#) (EPCO), a supplier of specialty lighting and wiring consumable products for electrical contractors, today announced that it has added a two-foot light fixture to its [GFF Series Linear Fluorescent Light Fixture line](#) (Gasketed Fluorescent Fixture) to meet a variety of unique wet-location applications, including commercial marine. EPCO President Jack Schuster explained that the two-foot fixture addition rounds out the company’s GFF Series™ product line. “It not only provides exceptional lumen output with T5 or T8 lamps, but also is IP67-rated for moisture- and dust resistance. It’s a perfect lighting choice for engine rooms, stairwells, storage rooms, and egress areas in commercial marine workboats, military and police patrol boats, fishing trawlers, freighters cargo holds, and other shipping and maritime facilities.”

Like the four- and eight-foot light fixtures in the GFF Series, the two-foot GFFS light fixture’s fiberglass housing in conjunction with its polycarbonate diffuser provides a high degree of protection to its internal components that is critical to eliminate the ingress of water in heavy seas.

The two-foot GFF Series Light Fixture reduces installation time and lowers labor costs. It features:

- One-, two, and three-lamp configurations for T5 and T8 lamps
- Solid fiberglass reinforced housing that provides strong rigidity and eliminates deflection
- Continuous “poured-in-place” gasket seals that protect against the ingress of water to its internal components
- Tethered gear tray that expedites installation and simplifies ballast replacement
- Luminaire disconnect to enable safe servicing of the light fixture and ballast

- Tool-less attachment of the compression-fitted UV-stabilized polycarbonate diffuser
- Ceiling or wall mounting brackets eliminates drilling through the fixture housing for installation
- Optional Specular reflectors that generate more usable lumens per watt

For more information about the new two-foot and other GFF Series Linear Fluorescent Light Fixtures or other EPCO products, call (800) 336-1976, contact sales@engproducts.com or visit engproducts.com.

About EPCO

Engineered Products Company supplies electrical distributors with specialty lighting, lighting accessories, and wiring solutions that address a wide range of standard and unique applications. EPCO's durable, reliable products, high fill rate, on-time delivery, and no-risk purchase terms optimize distributor cash flow and profit margins on the consumable products electricians use for commercial, industrial, agricultural and residential buildings. Known for its exceptional customer service, as well as sales representatives who are the most knowledgeable in the electrical industry, the Minneapolis-based company offers multiple configurations of products to meet a broad variety of building applications.
